The Sub-Fund is registered but not regulated by the CSSF.

Last updated on: April 2025

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The Sub-Fund is an actively managed open-ended investment compartment of the Fund, which is a multi-compartment investment company société d'investissement à capital variable (SICAV) organised as an umbrella reserved alternative investment fund (fonds d'investissement alternatif réservé - FIAR) in the form of a corporate partnership limited by shares (société en commandite par actions - SCA) in accordance with the provisions of the 2016 Law and the 1915 Law (the "**Law**"), as amended from time to time. The Sub-Fund is classified as an alternative investment fund for regulatory purposes. The assets and liabilities of the Sub-Fund are segregated from the assets and liabilities of other sub-funds of the Fund pursuant to the Law, with no right to transfer holdings to other sub-funds. The depositary of the Fund is BROWN BROTHERS HARRIMAN (Luxembourg) S.C.A.. See the "Other relevant information" section below for obtaining other information.

Term

The Sub-Fund will continue for an unlimited period of time, until being put into liquidation in certain specified circumstances including as described in the Fund Private Placement Memorandum ("Prospectus") and in the Sub-Fund Supplement ("Supplement"). Investors may request the redemption of their Shares on a quarterly basis as described in the Supplement, subject to the limitations set out in the Supplement. See the "How long should I hold it, and can I take money out early?" section below for further information on recommended holding period and information about the Product's redemption policy.

Objectives

It is intended that the Sub-Fund invests at least 95% of its assets in Ares Private Markets Fund, a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "**Master Fund**"), with the balance of the assets to be used for expenses, liabilities and other obligations.

The Master Fund's investment objective is to seek attractive long-term capital appreciation. In pursuing its investment objective, the Master Fund invests in an actively managed portfolio of private equity and other private assets (collectively, "**Private Assets**"). The Master Fund may gain access to Private Assets through a number of different approaches, including: (i) secondary purchases of interests in private equity and other private asset funds managed by unaffiliated asset managers "**Portfolio Funds**"), including through privately negotiated transactions, from investors in a Portfolio Fund or directly from the Portfolio Fund ("**Secondary Investments**"); (ii) primary investments in Portfolio Funds ("**Primary Investments**"); and (iii) direct investments in the equity and/or debt of private companies, including investments alongside private equity firms ("**Direct Investments**"). The Master Fund also invests a portion of its assets in a portfolio of liquid assets, including cash and cash equivalents, liquid fixed-income securities and other credit instruments, and other investment companies, including exchange traded funds ("**Liquid Assets**"). The Master Fund expects to invest principally in Secondary Investments and, to a lesser degree, in Primary Investments and Direct Investments, although the allocation among those types of investments may vary from time to time. Typical Secondary Investments generally will include purchases by the Master Fund of interests in Portfolio Funds, typically after the end of the Portfolio Fund's fundraising period, with existing underlying portfolio companies, whereas typical Primary Investments are investments in newly established Portfolio Funds where the underlying portfolio companies are not known as of the time of the Master Fund's commitment. Under normal circumstances, the Master Fund intends to invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in Private Assets. The investment adviser of the Master Fund seeks to invest in Private Assets that represent a broad spectrum of types of private equity and other private asset opportunities (e.g., buyout, venture and growth capital, special situations, infrastructure, real estate and private credit) and vintage years (i.e., the year in which a Portfolio Fund begins investing).

The investment adviser of the Master Fund [seeks to build a broad portfolio of assets within the Master Fund. By investing the Master Fund's assets across Secondary Investments, Primary Investments and Direct Investments, as well as in Liquid Assets, the investment adviser to the Master Fund] generally seeks to limit the Master Fund's exposure to uncalled commitments and to shorten the duration of expected cash flows relative to a traditional portfolio consisting substantially of Primary Investments. This portfolio construction approach is designed to maintain a relatively high level of exposure to Private Assets while still maintaining appropriate portfolio liquidity to manage repurchases of Master Fund shares from holders of the Master Fund's shares ("**Shareholders**").

The Master Fund will invest in a diversified portfolio of underlying investments (as provided in the Master Fund Prospectus). In doing so, the Sub-Fund will satisfy the diversification requirements set forth in the CSSF Circular 07/309 (including, without limitation, no investment into a single asset in excess of 30% of the Sub-Fund's assets).

The Sub-Fund does not intend to make use of leverage other than short-term borrowings. The maximum levels of leverage to be employed by the Sub-Fund shall not exceed (i) 300% of the Sub-Fund's net asset value (expressed as a percentage and calculated in accordance with the "gross method" (Article 7 of the Commission Delegated Regulation (EU) No 231/2013 ("AIFMR"))); and (ii) 200% of the Sub-Fund's net asset value (expressed as a percentage and calculated in accordance with the "commitment method" (Article 8 of the AIFMR)).

The Product accumulates distributions, thus, the Sub-Fund retains any realised net capital gains and investment income to increase the Sub-Fund's net assets. If amounts are distributed, these distributions will be reinvested into the Sub-Fund.

The returns for investors in the Product will ultimately depend on the value and the performance of the Master Fund and its underlying portfolio of investments. The recommended holding period for the Product is a period of six years, which reflects the liquidity and expected return profile of the Product.

Intended retail investor

The Product may be subscribed by professional investors and eligible retail investors as outlined in the Fund Prospectus and Sub-Fund Supplement. The Product is only intended for investors who: (i) understand the Product's strategy, characteristics and risks in order to make an informed investment decision; (ii) have knowledge of alternative strategies, (including (in particular) those that may use borrowing to leverage investment (such as this Product)) and financial markets generally; (iii) are able to maintain their investment in the Product over a long-term horizon; and (iv) are able to bear a loss of their investment or not recover fully the amounts that have been invested. The minimum initial subscription amount will be the higher of (i) EUR 100,000 (or the equivalent in the relevant currency), or a lower minimum, subject to the General Partner's approval (provided that the relevant Investor qualifies, at all times, as a Well-Informed Investor within the meaning of article 2 of the RAIF Law); or (ii) the minimum subscription amount required under the local law of the relevant retail investor.

What are the risks and what could I get in return?

Risk Indicator

1

2

3

4

5

6

7

← Lower risk
Higher risk →

The risk indicator assumes you keep the Product for 6 years. You may not be able to sell your product easily or sell at a price that significantly impacts on how much you get back. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of the Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the market or because we are not able to pay you. We have classified this Product as a 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. This Product does not include any protection from future market performance so you could lose some or all of your investment. If the Sub-Fund is not able to pay you what is owed, you could lose your entire investment.

Be aware of currency risk. You may receive payments in a different currency than the official currency of the Member State where the Fund is marketed to you and as the fund is denominated in US Dollars, so the final return you get will depend on the exchange rate between the applicable currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the Sub-Fund not included in the summary risk indicator are set out in the Supplement. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean risk free. The risk of the Product may be significantly higher than the one represented in the summary risk indicator where the Product is not held for the recommended holding period.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a representative of the asset class, in which the Product is expected to invest through the Master Fund, measured over the past 11 years. The stress scenario shows what you might get back in extreme market circumstances.

| Recommended holding period: 6 years Example Investment: USD 10,000 | | If you exit after 1 year | If you exit after 6 years |
|---|--|--|------------------------------|
| Minimum | | There is no minimum guaranteed return. You could lose some or all of your investment | |
| Stress scenario | What you might get back after costs | 7,958 USD | 6,141 USD |
| | Average return each year | -20.42% | -7.81% |
| Unfavourable Scenario | What you might get back after costs | 9,444 USD | 10,532 USD |
| | Average return each year | -5.56% | 0.87% |
| Moderate Scenario | What you might get back after costs | 11,097 USD | 24,916 USD |
| | Average return each year | 10.97% | 16.44% |
| Favourable Scenario | What you might get back after costs | 17,184 USD | 32,824 USD |
| | Average return each year | 71.84% | 21.91% |

The Unfavourable 1-year scenario occurred for an investment starting December 2021 to December 2022. The Moderate 1-year scenario occurred for an investment starting May 2023 to May 2024. The Favourable 1-year scenario occurred for an investment starting June 2020 to June 2021. The Unfavourable 6-year scenario occurred for an investment starting December 2021 to December 2024. The Moderate 6-year scenario occurred for an investment starting September 2017 to September 2023. The Favourable 6-year scenario occurred for an investment starting December 2015 to December 2021.

What happens if the Manufacturer is unable to pay out?

The investor may not face a direct financial loss due to the default of the Manufacturer. The Product is not covered by any investor compensation or guarantee scheme and you may face financial loss, should the Sub-Fund default on its obligations.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

| | If you exit after 1 year | If you exit after 6 years |
|-------------------------------|--------------------------|---------------------------|
| Total costs | 646 USD | 3,097 USD |
| Annual cost impact (*) | 6.5% | 4.5% |

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 20.9% before costs and 16.44% after costs.

Composition of Costs

| One-off costs upon entry or exit | | If you exit after 1 year | |
|---|--|--------------------------|-------------|
| Entry costs | The person selling you the product may charge fees and they will inform you of the total fee. The Product does not itself charge an entry fee. | 0 USD | 0.0% |
| Exit costs | Shares redeemed within the first 12 months of holding the Product will incur an early redemption fee equal to 2% of the NAV of the shares being redeemed. | 200 USD | 2.0% |
| Ongoing costs taken each year over the recommended holding period | | | |
| Management fee and other administrative or operating costs | There is an investment management fee of 0.20% and a further estimated 0.30% of additional ongoing costs. | 50 USD | 0.5% |
| Transaction costs | 3.96% of the value of your investment per year, including an estimate of the projected management and performance fees of the Master Fund. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 396 USD | 4.0% |
| Incidental costs taken under specific conditions | | | |
| Performance fees and interest | There is no performance fee for this Product, but these are included in the underlying investments. | 0 USD | 0.0% |

How long should I hold it, and can I take money out early?

Recommended holding period: 6 Years based on Product liquidity, portfolio investment and expected return profile. The Product is suitable only as long-term investment for persons of adequate financial means who do not need near-term liquidity from their investment. Redemptions are expected to be offered each quarter at the net asset value per share as per the terms of the Supplement. Redemptions are also subject to limits in relation to redemption requests for the Master Fund as a whole exceeding a certain threshold. Shares held less than one year will be subject to an early redemption fee equal to 2% of the NAV of the shares being redeemed.

The AIFM has not considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the Product to your needs, you should contact your placement agent or financial adviser and seek appropriate professional advice.

How can I complain?

Any complaint regarding the person advising on, or selling, the Product can be submitted directly to that person. Any complaint regarding the Product or the conduct of the Manufacturer should be addressed in writing to the AIFM at Complaints Officer, Carne Global Fund Managers (Luxembourg) SA, 3, Rue Jean Piret, L-2350 Luxembourg, or by email to Complaints@carnegroup.com or by consulting the following website www.carnegroup.com.

Other relevant information

Any additional documentation in relation to the Product and in particular the Fund's Prospectus and the Sub-Fund Supplement are available from the AIFM and on the following website <https://funds.s64capital.com/products/ares-private-markets-offshore-access-fund> in accordance with applicable legal requirements. In order to obtain more detailed information - and in particular details of the structure of and risks associated with an investment in the Product - you should read the Product documents. Further information on the past performance of the Product can be found at the website abovementioned, which also includes performance calculations that are updated on a monthly basis.

Additional information for investors in Switzerland: The Fund's Prospectus, the Sub-Fund Supplement, the relevant Key Information Documents, the Fund articles, Sub-Fund annual and semi-annual reports as well as further information are available free of charge from the Swiss Representative of the Fund: REYL & Cie SA, Rue du Rhone 4, 1204 Geneva, Switzerland. The Swiss Paying Agent of the Fund is REYL & Cie SA, Rue du Rhone 4, 1204 Geneva, Switzerland. The risk indicator and the performance scenarios have been calculated and presented according to the provisions of the home jurisdiction of the Fund.
